

VISBO is continuously working to improve our products and support our customers in optimizing their project portfolio. That's why we're developing new features, improving existing features, fixing issues, and improving our platform performance.

In the release notes you will find an ever-growing list of the most important functions and extensions.

New Functionality

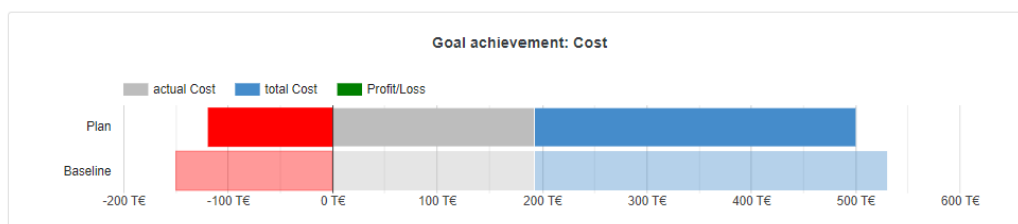

- Project Portfolio Cost List

Change the colors in the Portfolio Project List to use the same colors as in the single project overview

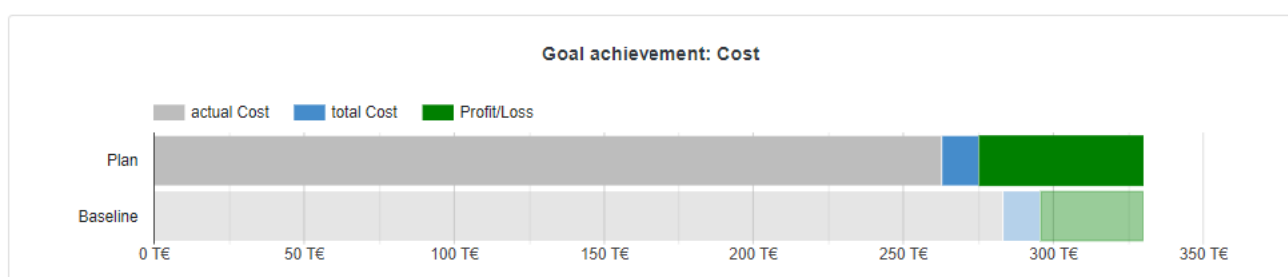

- Project Overview shows Profit/Loss for the Planned Costs as well as the Baseline

Extended the Goal Achievement of actual and total cost compared to the baseline

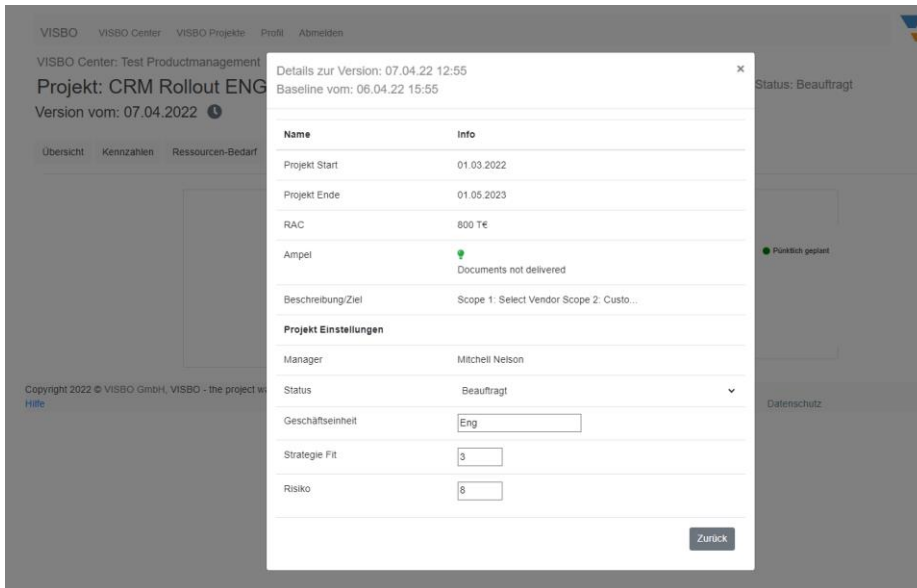

- Align Color Coding of Actual vs Total Costs for current Plan and Baseline

Use grey for actual costs and blue for estimated costs as in the project cost view

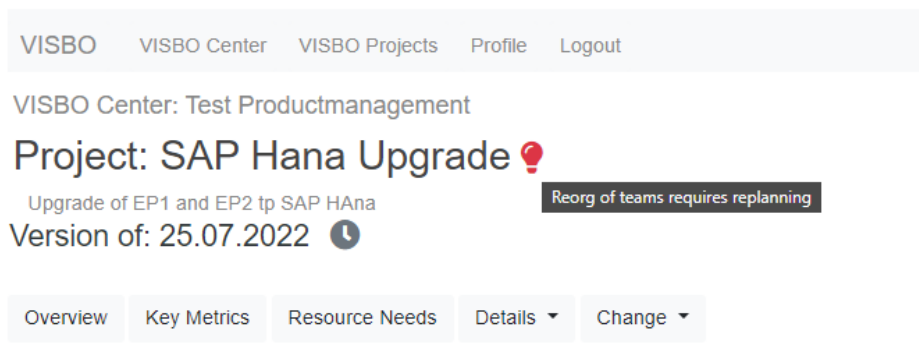

- Project Manager and customer-specific Project Number can be changed in the Project Properties Dialog.

The project properties dialog is available either via the Traffic Light Icon next to the project name or the Project Details Menu, item Properties.

- WebUI Tooltip shows Project Status with mouse-over

Explanation for project status is displayed at the traffic light on the project overview page.

Fixes

- Project list shows time difference in days instead of weeks (VS-1351)
